

Study System & Detailed Installation Manual

Complete guide to installing, configuring, and studying the 523-question SAA-C03 deck in Anki.

Independent study material. Not affiliated with, endorsed by, or produced by Amazon Web Services. Verify current features in official documentation and confirm distribution rights for source material.

1. Package Contents

- 523 high-yield scenario questions aligned with the AWS SAA-C03 exam specification.
- 323 questions from source material plus 200 rebuilt premium multi-option scenario cards.
- Card structure: Full correct answer, detailed explanation, decision signal, technical exam trap, and architecture maps.

2. Step-by-Step Installation Guide

- Desktop Installation: Download Anki for Windows, macOS, or Linux at <https://apps.ankiweb.net> and complete setup.
- Importing Deck (.apkg): Double-click the .apkg file or open Anki Desktop, go to File > Import, and select the deck file.
- AnkiWeb Cloud Sync: Create a free account at <https://ankiweb.net>, then click Sync in Anki Desktop to upload your deck.
- Mobile Setup (iOS / Android): Install AnkiMobile (iOS App Store) or AnkiDroid (Google Play Store), tap Sync, and log in to download deck data and diagrams.

3. Recommended Study Settings

- Daily Target: Set 15 to 25 new cards per day under Deck Options > New cards/day to ensure sustainable progress.
- Review Schedule: Complete all scheduled daily reviews before studying new cards.
- Algorithm: Ensure V3 Scheduler or FSRS is enabled under Tools > Preferences for optimized spaced repetition.

4. Decision Loop Methodology

- Step 1: Read the scenario and key business constraints (cost, availability, latency).
- Step 2: Formulate your answer BEFORE clicking Show Answer.
- Step 3: Analyze the explanation, decision signal, and technical exam trap on the back of the card.
- Step 4: Rate your performance (Again = missed requirement; Hard = guessed; Good = justified rationale).

5. Troubleshooting & FAQ

- Missing Media/Diagrams: Ensure cloud sync completes fully on mobile. On Desktop, run Tools > Check Media.
- Sync Conflicts: Select Upload if local device has your latest progress, or Download to sync from AnkiWeb.
- Quality Notice: AWS services evolve continuously. Verify quotas, pricing, and regional features in official AWS docs.

Before the first session	Done
Install Anki Desktop (Windows/Mac/Linux)	■
Import the .apkg deck file	■
Create free AnkiWeb account & sync	■
Install AnkiMobile (iOS) or AnkiDroid (Android)	■
Set daily limit (15-25 new cards/day)	■
